◆

Applicants are required under 35 U.S.C. §121 to elect disclosed species (as follows) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable.

- a) a specific peptide that is contained within the pharmaceutical or food composition. The configuration of each chiral center should be specified. (Also, in the event that the C-terminal carboxyl group is amidated, this should be made clear);
- b) one of the following: (i) a food composition, or (ii) a pharmaceutical composition;
- c) in the event that a pharmaceutical composition is elected, what is the "form" of the composition (i.e., tablet, powder, granule, pill or injectable)...?
- d) in the event that a pharmaceutical composition is elected, and in the further event that an injectable form is elected, is the "injectable form" a solution, a suspension or an emulsion?

Applicant is advised that a response to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a generic claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentable distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103 of the other invention.
